# ENLARGEMENT(S) OF THK
## WITH HP-RPL AND HP48GX or EMUlator48

I have now enhanced the first program with a second one

## PGR

For the « price of entering your « starting » THK
**LEAD NUMBER**  and **BIGHT NUMBER** you will get in the HP stack ( explore it
bottom to top ) the resulting first enlargement available that for :

ENLARGEMENT PROCESS TYPE I or RIGHT OF THE SPart-WEnd vector

ENLARGEMENT PROCESS TYPE II or LEFT OF THE SPart-WEnd vector

The only control of entry is for G.D.C = 1

## PGR2  or the reeling backward of the THK

Still for the modest price of entering
**LEAD NUMBER**  and **BIGHT NUMBER**   **don't do under  "3" as entry**

You will get on the stack ( explore it )

-   the original THK LEAD and BIGHT numbers
-
-   the LEAD and BIGHT numbers  of the « ROOT » THK from what it can be made
    and the type of the enlargement E1  or E2

REMEMBER : the entry put the progran on HALT and you have to make it CONT by
pushing « violet left arrow »  and « ON »  see HP manual
