

Tutorial for finishing the LLK

Tutorials I have seen are not really into much detail about the tying of the LLK, so I hope this will help with some of the details a bit.

1

The 8 strand wall knot ready to start on the LLK

2

4 of the 8 strands are all that are used in the next step so I only used every other strand. Make a 4 strand crown knot as shown in pics 3 thru 6. Be sure to lay strands as shown. The strands on the left side (X) of the four used to make the crown knot are the one that are followed or paralleled to complete the knot in later steps.

5

6

7

Tuck each of these 4 cords along side of the cord to it's left-o1 u1 for now.

8

Side view showing following of cord on left side, o1 u1.

9
Remaining 4 cords ready for final interlace

10
Lace cords as shown U1 O1 and to the right side of opposite cord

11
Cords shown in finished position.

12
Next set goes U1 O1 U1 O1 and to the right side of opposite cord

13
Both cords shown in the proper Over Under sequence.

14
Tighten and even up cords as much as possible.

15

The cords should all be in position now to follow the cord on it's left, creating a doubled knot.

16

17
Continue following the cord on the left in the Over Under sequence

18
Following cord on left side.

19

Continue with all 8 cords until they are all on top of the knot. You will reach a spot where one more under will start tripling the pattern,

20

That is when you go down through the edge of the knot

21

Continue now taking all 8 cords through the edge of the knot under the doubled section.

22

23

Last cord going through edge of the knot.

24

All 8 cords through the knot.

25

Finished knot ready to dress and trim cords a bottom edge of LLK.
